

SAMPLE ADR SOURCE DOCUMENT (For Demo ICSR Case Processing)

INITIAL SAFETY INTAKE NOTE

Case Type: Clinical Trial (Blinded Study)
Protocol No.: ONC-247-BRCA-II
Study Drug: AXM-201 (Investigational Product)
Reporter: Dr. Neha Sharma (Principal Investigator)
Site: Metro Oncology Research Unit, Mumbai
Patient Initials: R.K.
Age/Sex: 54 Years / Female
Weight: 71 kg
Ethnicity: Asian Indian
Subject ID: IND-2045-009
Date Received by PV Unit: 04-May-2026

NARRATIVE SOURCE DOCUMENT

Subject is a 54-year-old female enrolled in a randomized Phase II clinical trial evaluating AXM-201 in metastatic HER2-negative breast carcinoma.

Patient visited the site on 28-Apr-2026 with complaints of worsening generalized weakness, nausea, fever, loose stools, reduced appetite, and erythematous skin rash over bilateral forearms and upper chest for approximately 3 days. Husband mentioned patient was “confused at night” since 26-Apr-2026.

Temperature recorded at site: 101.8°F.
Blood pressure: 90/60 mmHg.
Pulse: 112/min.

Patient admitted for observation.

PAST MEDICAL HISTORY (Scattered Information)

- Type II Diabetes Mellitus diagnosed around 2014.
- History of hypertension “for many years”.
- Mild fatty liver identified during health checkup in 2021.
- Hypothyroidism since approximately 2018.
- Previous episode of neutropenia during prior chemotherapy regimen in November 2025.
- Breast carcinoma diagnosed in July 2024.
- Intermittent gastritis.
- Seasonal allergic rhinitis.
- No known tuberculosis history.
- Surgical history includes left modified radical mastectomy (September 2024).
- Family history significant for maternal ovarian cancer.

CONCOMITANT MEDICATIONS (Intentionally Unorganized)

Medication	Indication	Dose/Frequency	Start Date	Stop Date	Notes
Metformin	Diabetes	500 mg BID	2016	Continuing	—

Medication	Indication	Dose/Frequency	Start Date	Stop Date	Notes
Levothyroxine	Hypothyroidism	50 mcg OD	2018	Continuing	Morning before meals
Pantoprazole	Gastritis	40 mg PRN	Unknown	Continuing	Intermittent use
Ondansetron	Nausea	4 mg SOS	27-Apr-2026	Continuing	Started after nausea
Cefixime	Suspected infection	200 mg BID	25-Apr-2026	28-Apr-2026	Prescribed locally
Telmisartan	Hypertension	40 mg OD	2019	Held during admission	—
Herbal immunity supplement	Self medication	Unknown	March 2026	Continuing	Product name unavailable
Cetirizine	Allergy	10 mg PRN	Unknown	Continuing	—
Insulin glargine	Diabetes	10 units HS	Jan-2026	Continuing	Added recently
Paracetamol	Fever	650 mg SOS	26-Apr-2026	Continuing	—
Docetaxel	Prior chemotherapy	Per protocol	Dec-2025	Feb-2026	Completed
AXM-201 (study drug)	Breast cancer	400 mg IV weekly	10-Mar-2026	Interrupted 28-Apr-2026	Last dose on 22-Apr-2026
Dexamethasone	Premedication	8 mg	Intermittent	Continuing	Before infusions

ADVERSE EVENT DETAILS

Event 1

Preferred Term: Pyrexia

- Onset: 25-Apr-2026
- Outcome: Recovering
- Seriousness: Serious (Hospitalization)
- Action Taken with Study Drug: Interrupted
- Causality by Investigator: Possibly Related

Event 2

Preferred Term: Rash maculo-papular

- Onset: 26-Apr-2026
- Outcome: Recovering
- Seriousness: Non-serious
- Action Taken: Symptomatic treatment given

Event 3

Preferred Term: Diarrhea

- Onset: 25-Apr-2026

- Severity: Grade 2
- Outcome: Recovered on 30-Apr-2026

Event 4

Preferred Term: Febrile neutropenia

- Identified during hospitalization on 28-Apr-2026
- ANC reported: 780 cells/mm³
- SAE Criteria: Medically significant + hospitalization
- Outcome: Recovering

Event 5

Preferred Term: Confusional state

- Reported by caregiver
- Started approximately evening of 26-Apr-2026
- Resolved by 29-Apr-2026

LABORATORY DATA

Date	Test	Result	Reference Range
28-Apr-2026	Hemoglobin	9.2 g/dL	12–15 g/dL
28-Apr-2026	WBC	1.8 x10 ⁹ /L	4–11 x10 ⁹ /L
28-Apr-2026	ANC	780/mm ³	>1500/mm ³
28-Apr-2026	Platelets	145000/mm ³	150000–400000/mm ³
28-Apr-2026	ALT	74 U/L	<35 U/L
28-Apr-2026	AST	69 U/L	<35 U/L
29-Apr-2026	Blood culture	No growth	—
30-Apr-2026	WBC	3.4 x10 ⁹ /L	4–11 x10 ⁹ /L

HOSPITAL MANAGEMENT

- Patient admitted on 28-Apr-2026.
- Study drug AXM-201 withheld.
- Started IV fluids.
- Empirical IV piperacillin/tazobactam initiated.
- Filgrastim administered for neutropenia.
- Topical calamine lotion prescribed for rash.
- Infectious disease consult obtained.
- No ICU admission required.

- Patient clinically improved over next 48 hours.
-

ADDITIONAL SCATTERED NOTES

- Patient consumed street food during travel approximately 2 days before symptom onset.
 - No alcohol consumption reported.
 - Non-smoker.
 - ECG on admission: sinus tachycardia.
 - CT brain not performed.
 - SARS-CoV-2 rapid antigen negative.
 - Investigator mentioned differential diagnosis included viral gastroenteritis versus drug-related toxicity.
 - Rechallenge not attempted.
 - Subject remained in study under follow-up.
 - Next oncology review planned for 12-May-2026.
-

RAW EMAIL FROM SITE (Simulated Source)

“Patient R.K. developed fever with rash and diarrhea after last infusion. She was admitted due to neutropenia and weakness. Study medication currently on hold. Symptoms improving after antibiotics and supportive care. Kindly process as SAE. Causality assessed as possible for investigational product.”

KEY ELEMENTS AVAILABLE FOR ICSR EXTRACTION

Patient Information

- Age
- Gender
- Weight
- Subject ID

Suspect Product

- AXM-201

Concomitant Drugs

- Multiple scattered medications

Medical History

- Diabetes
- Hypertension
- Hypothyroidism
- Breast cancer etc.

Adverse Events

- Febrile neutropenia

- Pyrexia
- Rash
- Diarrhea
- Confusional state

Seriousness Criteria

- Hospitalization
- Medically significant

Important Dates

- Last dose date
- Event onset dates
- Admission date

Outcome Information

- Recovering / recovered

Action Taken

- Drug interrupted

Causality

- Possibly related
